

# CERTIFICAT

## OF APPROVAL

**No. 50-01**

Hereby certifies that:

**ScanPole AS avd Kirkenær**

Plant: Kirkenær/Solør

has received approval to mark preservative-treated products of European redwood (*Pinus sylvestris*) in wood preservation classes A with the Nordic quality label.

The approval refers to wood treated with the preservative Wolmanit CX-8 which contains copper, HDO and boron as active ingredients. Wood preservation classes AB and A imply a treatment in compliance with penetration class NP5 according to NS-EN 351-1 (full sapwood penetration) and a retention of preservative in accordance with the approval issued by the Nordic Wood Preservation Council (NWPC).

ScanPole AS avd. Kirkenær has a quality assurance system according to the requirements in NS-EN 351- 1 and NWPC Document No 1 “Nordic wood preservation classes and product requirements for preservative-treated wood. Part 1. Pine and other permeable softwoods”.

The production and factory production control are supervised by Norwegian Institute of Wood Technology. The supervision of the production includes determination of preservative penetration and retention in the wood as well as determination of the percentage of active ingredients in the preservative.

This approval is valid until October 10, 2024 but can be withdrawn if the requirements in NWPC Document No 1 are not fulfilled.

Oslo, June 15, 2021
